2007

**Drawing Week finalist**, National Art School, Sydney

### **Artist Statement**

The Australian landscape is a land like no other not just the colour of the rocks and minerals but the whole environment made up of its people and culture. This new series of works, 'Rejuvenation' explores this spirituality of the land and the harshness of the Australian Bush. In one sense I sought to show the colour and essence of this country in contrast to the harshness of the native trees and the struggles and survival of the bush fires. Contrasting spirituality with renewal and reawakening.
